Release Notes

Version V5.2.28.0 (To work with Version 5.20 TBC)

Installing or updating
- Download the Install.msi file
- Run executable and follow the prompts – This will automatically overwrite any previously installed versions of the available commands.

Included Commands

- *Sitech Conformance Report* – Command to be used for pavement conformance reporting. This is designed to conform surveyed points to design surfaces for the horizontal and vertical reporting required by most Road construction projects.
- *Sitech String Report* – Command to be used for line conformance reporting. This is designed to conform surveyed lines, and or points to a design line for the horizontal and vertical reporting required by most Road construction projects. Example use would be to report Kerbs, barrier and wall as-builts.
