

# Trimble Works Subscriptions

Get your construction technology simply and affordably with the flexibility to select the right technology and protection level for your business.

Construction technology increased accuracy and efficiency but typically requires a substantial upfront investment. Traditional purchasing models require you to manage licenses and budget for upgrades.

With a **Trimble• Works subscription**, you can acquire the latest technology for your fleet of machines and survey crew with reduced upfront costs. You can efficiently manage software and firmware versions, ensuring your technology remains current. Plus, affordable, regular monthly or annual payments will streamline your budget.

Available worldwide, the Trimble Works subscription delivers predictability and productivity with the flexibility to select the tier with the coverage and price point that meets your business needs and budget.

### Included with every subscription

#### **Licenses**

Access your Trimble Earthworks and Trimble Siteworks devices.

#### **Software and firmware maintenance**
